Who we are

MCP Ceramic is a brand that manufactures and distributes **premium sanitary wares**.

Our **purpose** is not to elude the customer but to make them **participants** in every step of the process. A relationship of **trust**, built on **transparency** and **sincerity**, lays the foundations for continuance throughout the years, providing **prosperity** to the brand.

MCP Ceramic **walks alongside** its customers: whether they decide to renew their house, get a new space, or set up a new office for their business. We want to represent unmatched **reliability** when it comes to sanitary products.

What we do

MCP Ceramic produces innovative **kitchen** and **bathroom** products with a **refined design**, for sustainable products that make **comfort, durability** and above all **hygiene** their strengths.

To guarantee these aspects, we have developed and applied to our range of products a series of **technological innovations** that improve both **aesthetic** and **functional** standards.

Given the wide range of choices and **minimalistic** styling of the products that can fit into any environment, MCP positions itself as a brand that goes **beyond just ceramics** but as the immediate reference when looking to furnish kitchen and bathrooms.

OUR STORY

The definition of **bathroom** or **kitchen** elements can influence people's daily lives. They are environments that witness the passing of people's days becoming **comfortable places**.

The story of MCP Ceramic speaks of **everyday life**. It speaks of the attention to people who rely on a brand to furnish environments that represent them on an **aesthetic level**, environments that make them feel **protected**, environments shared with the people they **love** and **respect** the most.

MCP Ceramic products become a small yet **important distinctive element**, chosen by those who wish to **furnish a working or living** space.

A newly married couple who furnishes their home together for the first time, an entrepreneur who defines his first office to welcome his future clients, a person who wants to give a new look to his apartment: MCP Ceramic is a **precious ally** in always creating that familiar atmosphere in which people **rely on** day after day.

How we work

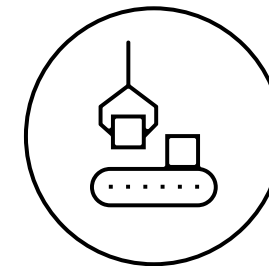

MCP Ceramic's mission is to become an integral part of consumers' **daily lives**, by distributing products **necessary** for **everyday hygiene**.

Our products are not only **highly functional** but they also have **aesthetic characteristics** that make them modern and **perfectly suitable** for different living contexts.

Their **minimalist** and **refined** style adapts to various environments, guaranteeing the possibility of having a **design product** in your home that responds **every day** to all the hygienic and functional needs of the person who **relies** on the MCP Ceramic high standards.

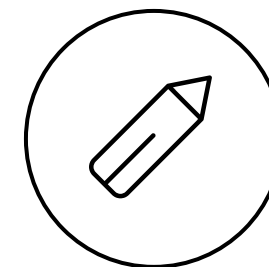

OUR GREEN APPROACH

MCP's environmental awareness has become one of its strengths and includes 3 main themes.

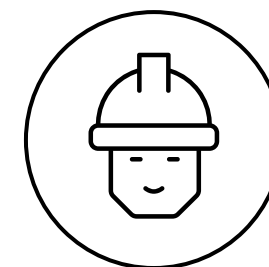

PRODUCTION

We focus on **renewable resources**, minimizing the use of natural resources in all production processes. We aim to prevent the **loss of raw materials** and **energy** through investments. We regularly **recycle** much of the waste generated during production and feed it back into production.

DESIGN

When we design our products, we prioritize **water conservation** and make improvements that can operate entirely on a **minimum** of water. We minimize the amount of water used for products.

EMPLOYEES

To raise our employees' awareness of this issue and help protect our world, we **train** them on environmental issues and conduct studies on relevant **certifications** in our factory. We base our **corporate culture** on an environmentalist approach.

OUR PRODUCTS

MCP Ceramic produces sanitary and kitchen wares, washbasins and toilets, through a production process that applies the right mix of **technology** and **expertise**.

Customers can choose the **product conformation** that will best meet their **taste**, without sacrificing the **materials quality** with which it is made, the **high product functionality** and its **highly resistance to bacteria**.

A strong attention is also given to the **materials** used for the construction of our products, which in addition to being **99.95% resistant to bacteria**, they meet the most **modern** and **sophisticated** criteria.

KITCHEN SINK

MCP fireclay kitchen sinks are high quality, durable and well-designed products. It offers a hygienic, useful, and smart option in the interior designs of modern kitchens. There are size alternatives for different places and color options for different tastes.

THE MONSOON SYSTEM

*Monsoon is the innovative system applied to MCP Ceramic's **rimless wall-hung toilet** that offers **unparalleled performance** and **hygiene**.*

Featuring the innovative **Tornado Flush technology**, the Monsoon system offers a **powerful and quiet internal flush** that ensures optimal cleanliness and efficient use of water. The rimless design of the MCP Ceramic products, combined with Tornado Flush technology, ensures **immaculate hygiene** and a **consistently clean** toilet.

The Monsoon system also features a **hydraulic** seat that ensures a quiet shut-off, **minimizing noise** and disturbance in the home. The stainless steel faucet provides durability and longevity, ensuring that the toilet is built to last.

In addition to its outstanding features, the Monsoon system was designed with **aesthetics** in mind. The **full glazing** of the toilet adds a touch of elegance and modernity to the bathroom while making it easy to clean and maintain.
